

Individual window solutions in aluminum and fine wood.

Superior German craftsmanship

Enthusiasm for innovation, passionate pleasure in aesthetics and the utter love of perfection create our drive for further development and serve as our source of inspiration. We are successful because of this. Because we take pleasure in your well-being.

Anton Wetzel, Director

Steffen Wetzel, Managing Director

Quality windows are an expression of individual taste, and for a long time, have been manufactured by only a few companies for a small amount of customers.

Due to industrialization, mass production of high-quality windows was attempted but quickly failed.

The variations shown on the following pages will give you a good impression of our high-quality products.

A simple, fashionable design, combined with our production skills, emphasizes the unique window systems produced from our manufacturing processes.

Tell us your personal desires for windows and doors and we will provide you with expert advice, which comes from over 50 years of experience. Together, we will work to provide you with the windows of your dreams.

Every customer provides us a challenge to create a special solution unique to each project.

Each window is manufactured by hand with great attention to detail using the highest quality materials combined with the latest technology by our highly skilled craftsmen. This provides our customers with a high-quality product that will last for many, many years.

Feel inspired and enjoy the beautiful possibilities of hand-made custom windows.

ERMETIC 5000/S

The sleek, timeless, classic profile design impresses through its traditional, straight lined form. The smooth recessed wing profile gives this design its unique appeal.

Milled and work in locking devices produced in the latest CNC production engineering for easy of cleaning and a more impressive appearance. Further qualities of this highest technology are more durability, burglar-proof, smooth operation and tightness.

ERMETIC 5000/S Soft-Line-Plus

The rounding off of all visible edges provides perfect harmony and aesthetics. This solid, million-fold proven profile design can be integrated everywhere.

We offer you standard visible hinges, covered with PVC caps in a variety of colours, or you can choose completely concealed lying hinges and also beautiful decorative hinges (see above).

ERMETIC 5000/S

Super-Soft-Line

This system is distinguished by its harmonious, rounded form.

The "blue clip" stands for the highest quality. It is fitting that the finest window available today bears this symbol because of the eternal beauty, endless durability and boundless design possibilities. One look and you will want them for yourself... forever!

ERMETIC 5000/S Oriental

This unique window design impresses through its play with concaved and convexed forms. Through beautifully produced lighting and shading effects, this profile design gives your house character and perfect beauty.

If desired, the interior glass can be provided with a beveled groove polished to perfection giving the window a rich appearance.

ERMETIC 5000/S

Cover-Glazing

This system combines the sash's overlapping, adhered glass surface with an aluminum attachment panel prefixed of the frame. Through this artistic craftsmanship a completely new look is created. In addition multifaceted colour designs leave room for a wide range of creative accentuations.

Completely concealed lying metal fittings. No visible hinges – less wear and a longer duration of life plus perfect tightness are the characteristics of this detail.

System & Technology

Durability, weather-resistance, low-maintenance and easy to clean are the characteristics of this aluminum attachment panels available in every colour on the exterior. And window frame painting is completely eliminated!

Thickness of frame 68 mm (83 mm*) and sash 72mm/81mm (90 mm*/99 mm*) dependent of the interior wood profile design is reached.

* complete profile depth when combined with the aluminum hollow chambered profiles.

On inquiry we offer you the highest technology with welded corners of the aluminum attachment panels. With this invisible corner connection you get a perfect window design. Only for surfaces in powder coat, not in anodized, possible!

Interior made of cosy wood in a wide range of wood types and in a variety of colours.

Unique clip system for quick, no-fuss replacement of glass.

Superior glazing technology. Glass panes which are conglutinated and additionally sealed, as is done in the automobile industry, provide increased tightness and torsion rigidity.

Choose from six wood-profile designs suitable for every style of your interior furnishings.

Three uninterrupted sealing levels provide higher steam impermeability from the inside as well as optimal driving rain tightness and increased noise reduction; no points of contact and an insulating air cushion between aluminum and wood nor between wood and wood.

Window interior

Wood is more than just another raw material – it is our philosophy. We use only the best and most precious species of wood for our customers. Wood allows us a world of endless possibilities in design and creativity.
